

American Critical Minerals Association Welcomes New Members to Strengthen U.S. Critical Mineral Supply Chain

WASHINGTON – [February 15, 2024], The American Critical Minerals Association (ACMA) today announced the addition of eight new members and two affiliates, marking a significant step forward in growing and bolstering the United States' critical mineral supply chain.

These new members, ranging from leaders in mining, processing, and recycling of critical minerals to manufacturers, underscore the diverse and growing commitment to securing a domestic and sustainable supply of critical minerals essential for economic and national security, innovation, and technological advancement.

The eight new members joining ACMA are:

- 6K
- Phillips 66
- Transocean
- Global Sea Mineral Resources
- Tunica-Biloxi Tribe of Louisiana
- 3 Proton Lithium
- Energy Capital Vietnam
- Bipartisan Policy Center

The National Electrical Manufacturers Association (NEMA) and Sibanye-Stillwater have joined ACMA as Affiliates.

These organizations join a growing alliance of companies and organizations committed to enhancing the United States' leadership in critical mineral production, processing, and recycling. Their addition to ACMA reflects a collective recognition of the strategic importance of critical minerals to our national and economic security.

"By welcoming these eight new members, ACMA strengthens its foundation and expands its reach across the critical minerals supply chain," said Sarah Venuto, Executive Director of ACMA. "Their diverse capabilities and innovative technologies will play a vital role in achieving our mission of establishing a secure, sustainable, and independent critical minerals industry for the United States."

ACMA and its members continue to advocate for common-sense federal policies that support the growth of the domestic critical minerals industry. This includes initiatives aimed at enhancing processing capabilities, promoting recycling innovation, and reducing reliance on foreign sources of these strategic materials.

About the American Critical Minerals Association (ACMA): ACMA is an industry association committed to advancing the growth of a domestic supply chain for critical minerals, with a particular focus on processing and recycling. While progress continues to be made at the federal level and across multiple economic sectors, significant work remains to ensure the nation's economy and national security are no longer reliant on adverse nations for the supply, processing, and recycling of these strategic materials.

ACMA and its members advocate for common-sense federal policies that will advance a sustainable and independent future for the American critical minerals industry.

ACMA serves as the unified voice to advance U.S.-based critical mineral processing and recycling capacity for the benefit of multiple sectors, including but not limited to, the defense, transportation, aerospace, energy, technology, and manufacturing sectors.
